JAN 24 1953

Gov. Pyle -
State of Arizona
Phoenix, Arizona

Dear Gov. Pyle:

We poor people of Phoenix would forever bless your name as a wonderful saviour of the people if you would interest yourself in the problem of health.

I have four children - my husband is in the hospital with tuberculosis - Whenever they are sick - they have to lie in bed at home taking aspirins or other medicine I get at the drug store. I am not a doctor - in fact a very poor substitute as a nurse - but I do know that a child with 104 fever cannot be taken out of bed and ride a bus across the city to the waiting room of the county clinic - There to

wait another four hours in a waiting room crowded with another hundred sick people - Some with eruptive diseases - fever - colds - flu - venereal diseases - sore throats - all crowded together in a small space. When at last we are admitted to a doctor - he rather ~~scorf~~ scornfully examines the patient (at least that is the impression I have always recieved) and writes down - 3 shots = 1 each day - which means a trip across town in a bus for three days with a child in fever for another wait each day of 3 to 4 hours. I have done this so many times that no one can tell me that this isn't the usual procedure, the only other alternative is to keep them home and dose them ourselves. If I kill one of these youngsters with medicine I have no business giving them = no one would ever know or care. Even I wouldn't know that I had. All I would know is that one of

3 Health

my darlings was dead because I couldn't afford a doctor of my own who would know the Child's case from A to Z. —

Why can't we pick our own doctor — go to him and if we need hospital care — be admitted without going thru the clinic — They don't need that clinic at all — It does absolutely no good.

If a doctor could doctor the patient at home — he certainly wouldn't send him to the hospital so you wouldn't have to build a bigger waiting room or a bigger hospital or hire more expensive doctors. This town is full of doctors. There are enough to go around.

Other States does this — why not Arizona? My mother is an old age pensioner in Illinois She has her own doctor and has never been in a hospital.

4. Health.

If Illinois can do it - why not Arizona?

If you were a Democrat I'd expect a lot of talk and no action - Since you are a Republican, we are looking to you for action and not just ~~talk~~ words,

Sincerely,
Mrs. Eva Dailey
