

APR 19TH
Buckeye meet.

B-8
F-7

April 12, 1961

Mr. Leonard Dankowski, Chairman
Industrial Development Board
Buckeye Chamber of Commerce
P. O. Box 807
Buckeye, Arizona

Dear Mr. Dankowski:

Pursuant to our recent correspondence, please send me the following information by return mail:

- (1) Names and business identification of the officers and board of directors of your chamber.
- (2) Total number of members and a breakdown of the various classifications of memberships.
- (3) Total income to the chamber from (a) members (by classification); (b) City; (c) any other source.
- (4) Activities sponsored and/or endorsed by your chamber and expenditures, if any, for these projects.
- (5) Your personal reaction to your CofC's assets, (programs that are helpful to the community and to your citizens) as well as your liabilities (such as disinterest, lack of cooperation, negative thinking, etc.).

The people I am bringing with me to your meeting on April 19th are working in various ways on community development, as well as statewide industrial development. There is no magic formula that brings success to any community, but there are many things that can be done which will put your town in a position to receive the attention of industry, as well as tourists and other economic developments.

Mr. Dankowski

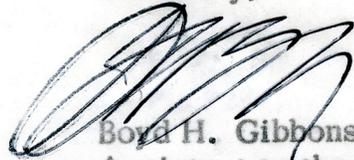

-2-

April 12, 1961

No attempt will be made by us to "tell you what to do". Our desire is to observe what you have or what you haven't; what you have or have not done in the past; what you should or should not do in the future in comparison to other communities that have similar problems.

Your cooperation in furnishing the information I am requesting will be appreciated, and you can be assured it will be treated confidentially. Please be sure that you get every possible leader - old timers, newcomers and negative thinkers as well as positive thinkers - to this meeting and maybe we can help Buckeye develop a positive action program for your economic future.

Sincerely,

Boyd H. Gibbons, Jr.
Assistant to the Governor
for Industrial Development

cc: Mr. Bill Butler
