Jane Hull
Governor of Arizona
Phoenix, Arizona

RECEIVED
GOVERNOR'S OFFICE

Dear Gov. Hull:

As a native and tax payer and voter I am writing to let you know that I am insensed over your idea to get more Wetback/illegals to come to our state.

We have more than 1,000 border officers trying to keep these law brakers from swarming here, and there you are trying to get more to come. It is a travesty. I went through the Bracero program and I promise you that every single person brought here to work is still here. Not a single one every went home.

What you need Ms Hull is to get to the real life. You need to go to Los Angeles and see what the wetbacks have done to that once beautiful city. Even go out on Greenway right in this city or down south and see how the damn wetbacks trash-out a place. Every place you look you see them. Don't we have enough?

Go into the Southwest Markets and see them with food stamps and on welfare. Go to the jails and see how the government is dealing with them. Who is doing the drive-by shootings? And who are the gangs on the streets. You haven't seen anything yet either, when it comes to gangs and grafitti. This new crop of young ones are vicious. I travel a lot and go to Mexico. In one small town they closed the school. This place is S. of Douglas in Sonora. The children were smuggled by persons, related or friends who have "green" cards and can cross the border, to Phoenix and other cities to go to school at the American taxpayers expense. Our schools are full of them. It isn't right and you go to Mexico to arrange for more to come!!

The solution too is to make it a felony for anyone to hire an illegal. I know you weak-kneed politicians will not go for that. How about making it a misdemeanor for anyone to hires an illegal and for anyone working on their own here. And a felony for an illegal caught here the 3rd time after sending him back or I mean taking him back 2 times prior? This is a serious problem and it should be faced right now. By making it a state crime, it will involve all the police , city, county, state to enforce it as well as the federal.

As a citizen I am fed up with the illegals who take jobs from citizens and with the crime and with the trash they cause. They are law breakers and the penalty should fit the crime. It's a problem for all of us and as I said it had better be faced right now or we'll all regret it.

You have that responsibility right on your shoulders and we demand you do something about it.

A concerned and angry citizen,
