 Sentencing Judge: Arizona Death Sentence Cases, 1974–July 1, 2000 43

Appendix C. Explanatory Notes for Time Interval Figures, Exhibits 25–31 46

Introduction

The Attorney General's Capital Case Commission was formed in recognition of the need for a comprehensive study of the death penalty process in Arizona. The Commission has four subcommittees: three examine specific parts of the death penalty litigation process (Pre-Trial Issues, Trial Issues, and Direct Appeal/Post-Conviction Relief Issues) and the Data/Research Subcommittee is responsible for compiling data and providing statistical analyses to the Commission.

The Commission has requested that the Data/Research Subcommittee explore three distinct data sets. This report summarizes key information contained in Data Set I. It examines the characteristics of the 230 Arizona death sentence cases (involving 228 individuals) from 1974 through July 1, 2000. The data set is based on original documents provided by the Office of the Arizona Attorney General, the Arizona Supreme Court, the County Clerk's Offices, the United States District Court for the District of Arizona, and the Arizona Department of Corrections. It focuses on:

- the number and type of aggravating and mitigating factors found to exist by sentencing judges;
- the number and type of conviction and sentence related remands, reversals, or modifications in the appellate process of the cases;
- case outcomes;
- time intervals for key junctures in the sentencing and appellate process; and
- preliminary defendant and victim profiles, including relationships between victims and defendants, and group characteristics (such as; age, race/ethnicity, gender, and county of residence).

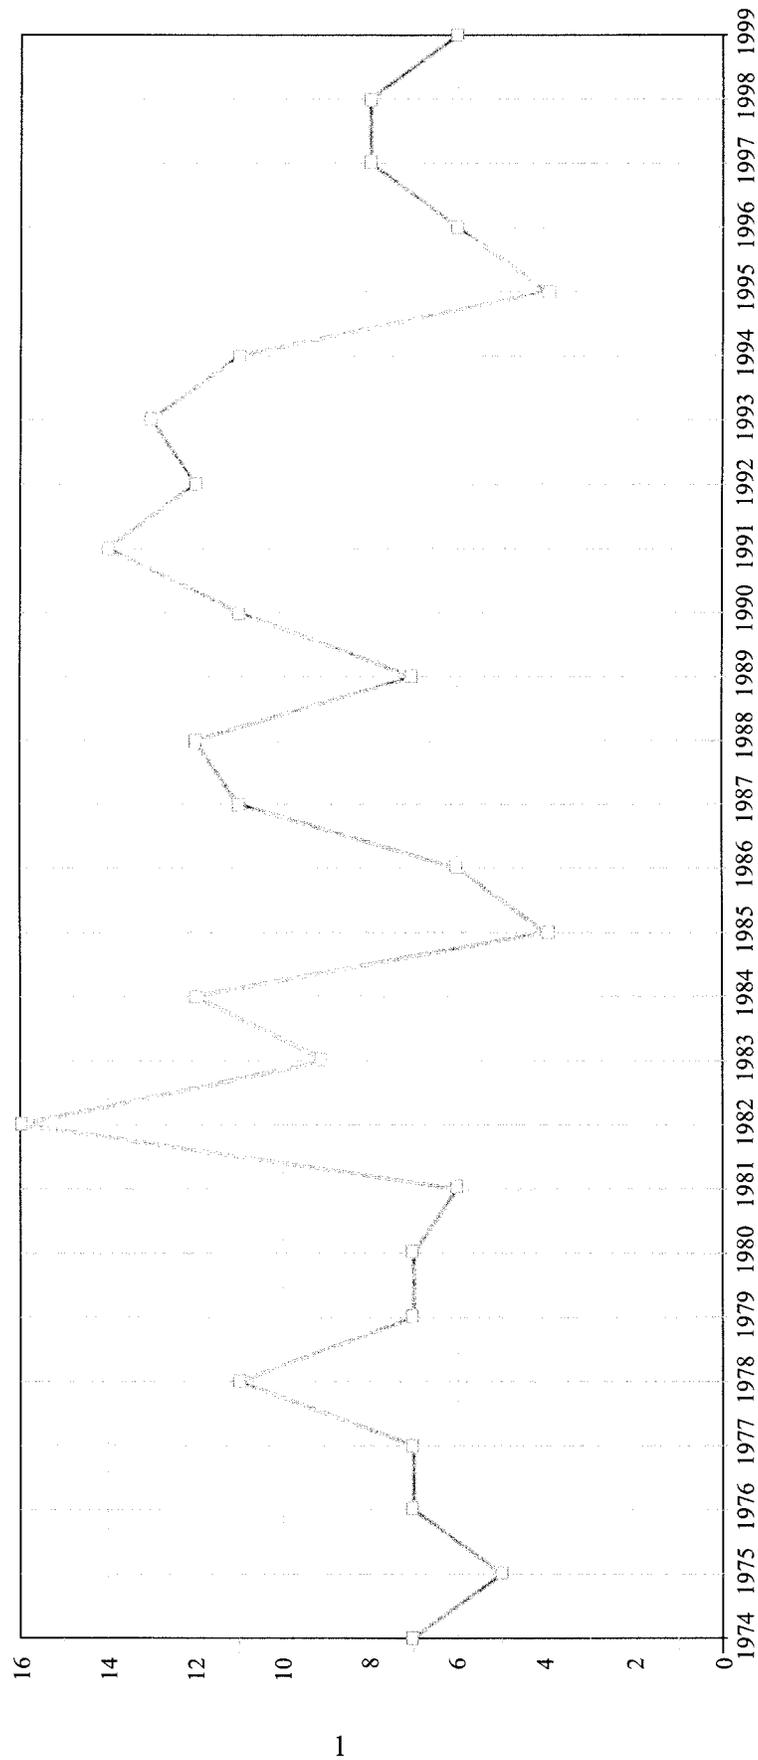

Data Set II will facilitate a comparative analysis of capital cases and other first degree murder cases during the five-year period, January 1, 1995, through December 31, 1999, for Maricopa, Pima, Coconino, and Mohave counties. Data Set III will explore the incremental additional costs of prosecution, defense and appeal of a capital murder case compared to a non-capital murder case.

Acknowledgments

We are deeply grateful to the many individuals who have made major contributions to the research endeavor. These include: **Center for Urban Inquiry and College of Public Programs at Arizona State University:** Cyndee Coin, Janet Soper, Jolan Hsieh and Anne Schneider; research associates, assistants, and apprentices, Cory Gonzales, Kim Furumoto, Jeanine Giordano, Kate Engstrom, Kelly Guth, Lisa Hird, Rebeca Hoeffler, Bin Liang, Kathy McCaghren, Toni Quintana, Natalie Ramos, Rashad Shabazz, Rina Shah, Anitra Smith, Susan Trower, and Eric Welch.

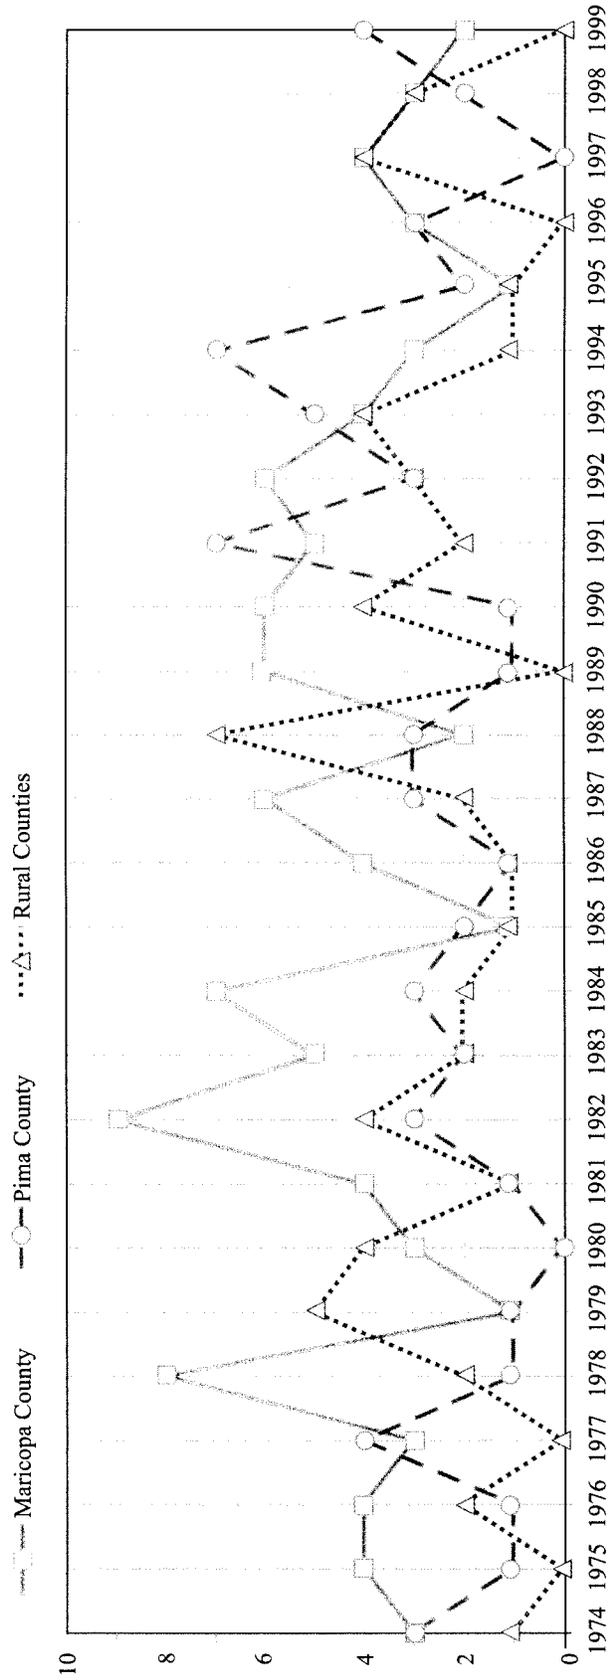

The Arizona Attorney General's Staff, Diane Saunders, Scott Bales, Dennis Burke, Kent Cattani, Patrick Cunningham, and Tim Geiger; **Maricopa County Attorney's Office,** Paul McMurdie; **Arizona State Department of Corrections,** Daryl Fischer; **Arizona Supreme Court Staff Attorneys Office,** Donna Hallam; **Arizona Supreme Court,** Noel Dessaint; and **U.S. District Court for Arizona,** Kristine Fox. For special assistance in gathering and processing victim-related data, we are grateful to Jan Christian, **The Restorative Justice Project,** and Teena Olszewski, Director, **Arizona Attorney General Victim Services.** For special assistance in gathering defense counsel-related information, we thank the staff of **Osborn Maledon** and the **Office of the Attorney General.**

Exhibit 1. Arizona Death Sentences by Year, 1974–1999
(N = 227)*

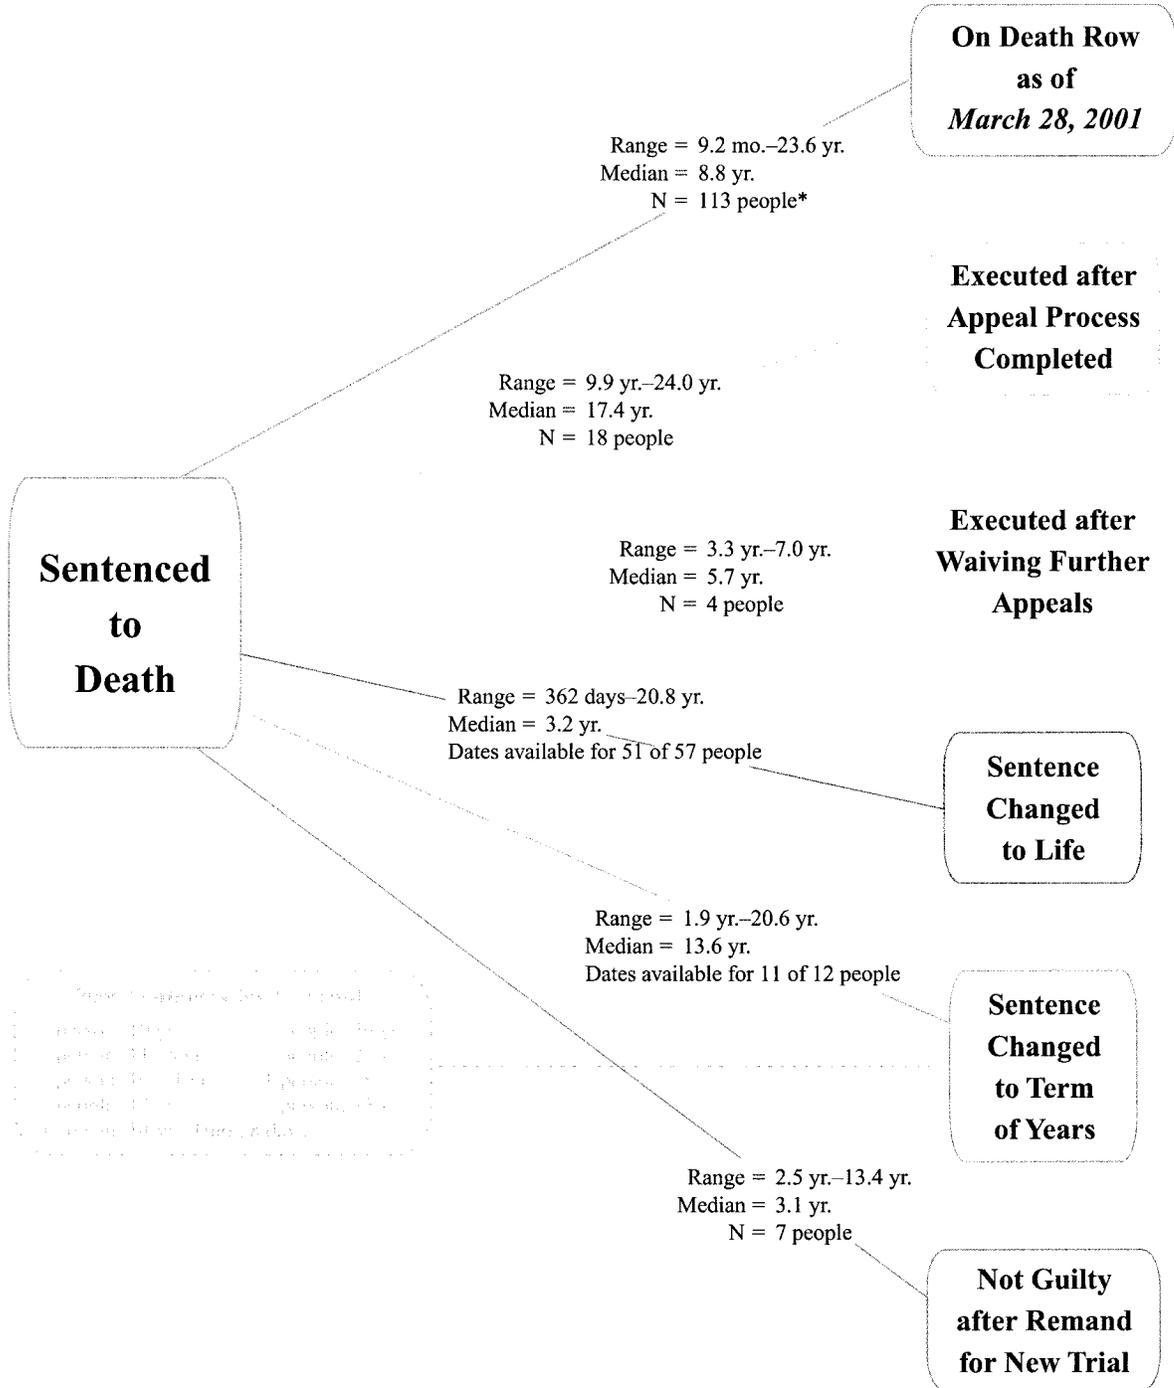

*Three death sentences from January 1–July 1, 2000, included in the data set are not depicted here.

Exhibit 2. Arizona Death Sentences by County and Year, 1974–1999
 (N = 227)*

*Three death sentences from January 1–July 1, 2000, included in the data set are not depicted here.

**Exhibit 3. Major Time Intervals:
Arizona Death Sentence Cases, 1974–July 1, 2000**

(Faint, illegible text, possibly bleed-through from the reverse side of the page)

The median is the middle value in the ranked distribution of values.
The range indicates the lowest to the highest values.
*Seventeen of the 228 individuals in the study are not accounted for by these time intervals, including 8 in custody awaiting retrial or resentencing and 9 who died while on death row.

**Exhibit 8. Aggravating Factors Found to Exist by Trial Court Judges:
Arizona Death Sentence Cases, 1974–July 1, 2000**
(N = 230)

Factor ^a	Statute	Found
Offense committed in an especially heinous, cruel or depraved manner.	F6	176 (76.5%)
Defendant committed the offense in expectation of anything of pecuniary value.	F5	112 (48.7%)
Defendant previously convicted of a serious offense.	F2	84 (36.5%)
The defendant has been convicted of another offense in the United States for which, under Arizona law, a sentence of life imprisonment or death was imposable.	F1	50 (21.7%)
During commission of this offense, the defendant knowingly created a grave risk of death to another person.	F3	31 (13.5%)
Defendant has been convicted of other homicide(s), which were committed during the commission of the offense.	F8	29 (12.6%)
Defendant was an adult at the time the offense was committed, and the victim was under 15 years of age or over 70 years of age.	F9	23 (10.0%)
Defendant committed offense while in custody or on release.	F7	9 (3.9%)
Defendant procured the commission of the offense by payment.	F4	7 (3.0%)
Murdered person was an on-duty peace officer.	F10	1 (0.4%)

^aIn 1973, the Arizona Legislature enacted A.R.S. § 13-454(E) (renumbered as § 13-703(F) in 1978), codifying six aggravating circumstances: (1) Prior conviction for which a sentence of life imprisonment or death was imposable; (2) Prior serious offense involving the use or threat of violence; (3) Grave risk of death to others; (4) Procurement of murder by payment or promise of payment; (5) Commission of murder for pecuniary gain; (6) Murder committed in an especially heinous, cruel or depraved manner.

The Legislature subsequently added the following additional aggravating circumstances: (7) Murder committed while in custody (effective Oct. 1, 1978); (8) Multiple homicides (effective Sept. 1, 1984); (9a) Murder of a victim under 15 years of age (effective May 16, 1985); (10) Murder of a law enforcement officer (effective Sept. 30, 1988); and (9b) Murder of a victim 70 years of age or older (effective July 17, 1993).

Exhibit 9. Death Sentence Cases in Which Only a Single Aggravating Factor Was Found to Exist by Trial Court Judges: Arizona, 1974–July 1, 2000
(N = 58)

Factor	Statute	Found
Offense committed in an especially heinous, cruel or depraved manner.	F6	39 (67.2%)
Defendant committed the offense in expectation of anything of pecuniary value.	F5	11 (19.0%)
During commission of this offense, the defendant knowingly created a grave risk of death to another person.	F3	4 (6.9%)
Defendant previously convicted of a serious offense.	F2	3 (5.2%)
The defendant has been convicted of another offense in the United States for which, under Arizona law, a sentence of life imprisonment or death was imposable.	F1	1 (1.7%)
Defendant procured the commission of the offense by payment.	F4	0 (0.0%)
Defendant committed offense while in custody or on release.	F7	0 (0.0%)
Defendant has been convicted of other homicide(s), which were committed during the commission of the offense.	F8	0 (0.0%)
Defendant was an adult at the time the offense was committed, and the victim was under 15 years of age or over 70 years of age.	F9	0 (0.0%)
Murdered person was an on-duty peace officer.	F10	0 (0.0%)

**Exhibit 10. Statutory Mitigating Factors Found to Exist by Trial Court Judges:
Arizona Death Sentence Cases, 1974–July 1, 2000
(N = 230)**

Statutory Mitigating Factor ^a	Statute	Found
The defendant's age.	G5	25 (10.9%)
Defendant's capacity to appreciate the wrongfulness ... was significantly impaired ... but not enough to constitute a defense. ^b	G1	13 (5.7%)
Defendant was under duress.	G2	3 (1.3%)
Defendant legally accountable for the conduct of another ... but participation was relatively minor.	G3	1 (0.4%)
Defendant could not reasonably have foreseen that his conduct in the course of the commission of the offense ... would cause, or would create a grave risk of causing, death to another person.	G4	1 (0.4%)

^aThese factors were found to exist by trial court judges, but none were ruled to outweigh aggravating factors.

^bSee Appendix A for further information.

**Exhibit 11. Nonstatutory Mitigating Factors Found to Exist by Trial Court Judges:
Arizona Death Sentence Cases, 1974–July 1, 2000
(N = 230)**

Type of Mitigating Factor^a	Found to Exist by Trial Judge^b
Negative Background Factors, Impact of Childhood and Family Such as “childhood sexual abuse, exposure to domestic violence, and deprived childhood, alcoholic father, dysfunctional family, and parents died when defendant only 14, lack of education, gang membership, and victim of sexual abuse.”	67 (29.1%)
Positive Character Traits Such as “military service, responsible member of community, prior good acts on part of defendant.”	50 (21.7%)
Minimal Record Criminal/Violent Such as “no prior record, no record of past violence, and lack of significant criminal history.”	36 (15.6%)
Positive Family Characteristics Such as “strong relationship with family, is a good father, and good family background.”	34 (14.8%)
Mental Health Issues^c Such as “post traumatic stress syndrome, disassociative state, and near borderline of mental retardation.”	33 (14.3%)
Negative Impact of Alcohol and Drugs Such as “longstanding substance abuse problems, history of alcohol abuse, and intoxication.”	32 (13.9%)
Evidence of or Potential for Rehabilitation Such as “potential for rehabilitation, newfound religious beliefs, and has changed life.”	13 (5.7%)
Felony Murder as Basis for Death Sentence Such as “conviction based on felony murder, convicted of felony murder and not premeditated, and convicted of 4 counts of murder under felony murder instructions.”	13 (5.7%)
Codefendant Treatment Such as “codefendant sentenced to life imprisonment, codefendant received lesser sentence, and codefendant not prosecuted.”	7 (3.0%)
Leniency Recommended Such as “members of the victim’s family support the life sentence, leniency recommended by police, and state recommends against death penalty.”	5 (2.2%)
Criticisms of Criminal Justice System Such as “state offered plea bargain to defendant and corrupt and coercive prison reality.”	3 (1.2%)

^aBut no factors were ruled to outweigh aggravating factors. Percentages do not add to 100 because multiple factors may apply to a single case

^bPercentages do not add to 100 because multiple factors may apply to a single case.

^cSee Appendix B for further information.

^aIn *Lockett v. Ohio*, 438 U.S. 586 (1978), the United States Supreme Court held that the Eighth and Fourteenth Amendments require that the sentencer not be precluded from considering as a mitigating factor, any aspect of a defendant's character or record and any of the circumstances of the offense that the defendant proffers as a basis for a sentence less than death. Applying *Lockett*, in *State v. Watson*, 120 Ariz. 441 (1978), the Arizona Supreme Court struck the portion of Arizona's death penalty statute that limited consideration of mitigating circumstances, and remanded the case to allow the defendant to present any mitigating circumstances tending to show why the death penalty should not be imposed.

Exhibit 13. Explanatory Notes for Issue Categories in Remands, Reversals, and Modifications

Aggravating factors include findings that aggravating factors at sentencing were not supported by evidence or were inappropriately considered by the trial court.

Constitutional issues include 6th Amendment, right to speedy trial, double jeopardy, 5th Amendment (self-incrimination), 8th Amendment (death penalty cruel and unusual punishment), and challenges to specific aspects of the Arizona death penalty statutes.

Enmund/Tison. In felony murder cases, under *Enmund v. Florida*, 458 U.S. 782 (1982), and *Tison v. Arizona*, 481 U.S. 137 (1987), the death penalty should not be imposed unless the defendant killed, intended to kill, or attempted to kill. If that criterion has not been met, the defendant is not death eligible unless he or she was a major participant in the underlying felony and acted with reckless disregard for human life.

Expert testimony includes issues such as violation of patient confidentiality, and giving fraudulent testimony.

Felony murder includes issues such as lack of proof of predicate felony and insufficient evidence of direct participation.

Improperly excluded evidence includes issues such as disallowed co-defendant testimony, limitation of cross-examination of co-defendant, and newly discovered exculpatory evidence

Inadmissible evidence includes issues such as hearsay testimony, inflammatory physical and/or photographic evidence, use of videotaped confessions or testimony, and inaccurate evidence of defendant's criminal history and "bad acts."

Ineffective assistance of counsel includes prejudicial conduct, failure to develop mitigating evidence, and failure to challenge prosecution evidence at trial.

Insufficient evidence includes issues such as verdicts not supported by evidence and insufficient evidence to convict.

Judicial error includes issues such as coercion of juror and *ex parte* communications.

Juror error includes issues such as consideration of extrinsic evidence.

Jury instruction includes inadequate or improper jury instructions regarding second degree or lower homicide, elements of homicide offenses charged,

elements of other offenses, and admissibility/consideration of evidence.

Jury selection/*voir dire* includes such issues as improper dismissal of potential jurors and inadequate *voir dire*.

Law enforcement error includes issues such as involuntary statement, illicit custodial interrogation, coerced confession, warrantless search, lack of probable cause, invalid warrant, and *Miranda* violation (failure to provide access to requested counsel).

Mitigating factors includes findings that mitigating factors at sentencing were not properly considered or weighed by the trial court.

Other due process/procedural issues includes issues such as inadequate record of sentencing hearing.

Prosecutorial error includes issues such as state exhibit not timely disclosed, arraignment delay, failure to preserve material evidence, unenforceable plea agreement, fabricated evidence and failure to disclose plea agreement.

Trial court rulings (pretrial and during trial)—and aside from evidence and jury instruction issues set out above—includes issues such as improper refusal to conduct competency hearing, failure to sever charges, and failure to sever co-defendant trials.

Trial court rulings (sentencing-related) includes pre-sentencing, sentencing, resentencing and evidentiary hearing issues.

Watson Ruling refers to the 1978 *State v. Watson* (Arizona). In *Lockett v. Ohio*, 438 U.S. 586 (1978), the United States Supreme Court held that the Eighth and Fourteenth Amendments require that the sentencer not be precluded from considering as a mitigating factor, any aspect of a defendant's character or record and any of the circumstances of the offense that the defendant proffers. Applying *Lockett*, in *State v. Watson*, 120 Ariz. 441 (1978), the Arizona Supreme Court struck the portion of Arizona's death penalty statute that limited consideration of mitigating circumstances, and remanded the case to allow the defendant to present any mitigating circumstances tending to show why the death penalty should not be imposed.

Exhibit 24. Type of Defense Attorney at Conviction, Direct Appeal, Post-Conviction Relief, and Habeas: Arizona Death Sentence Cases, 1974–July 1, 2000^a

Process Stage	Public Defender		Court Appointed ^b		Private		Totals
Conviction	76	37.3%	117	57.4%	11	5.4%	204
Direct Appeal	60	28.7%	141	67.5%	8	3.8%	209
Post-Conviction Relief	24	11.4%	183	87.1%	3	1.4%	210
Habeas	21	21.0%	78	78.0%	1	1.0%	100
Totals	181	25.0%	519	71.8%	23	3.2%	723

^aThe total of 723 recorded attorneys includes only lead counsel or designated second counsel involved in these four stages of litigation in the 230 cases. The mean number of attorneys involved in a case was 3.1, although many more were involved in various appeal briefs, especially in federal habeas corpus proceedings.

^bThe “court appointed” status includes attorneys compensated for contract work and those accepting appointment without compensation.

Ineffective Assistance of Counsel

From 1974 to July 1, 2000, nineteen defendants received remands/reversals or modifications based on Ineffective Assistance of Counsel. Thirteen defendants were granted *resentencings* due to ineffective assistance of counsel. Of the thirteen cases, eight defense attorneys were court-appointed and three were public defenders. No information is available on attorney status in the remaining two cases. Eight of the thirteen cases were from Maricopa County, three were from Pima County, one was from Yavapai County, and one was from Yuma County.

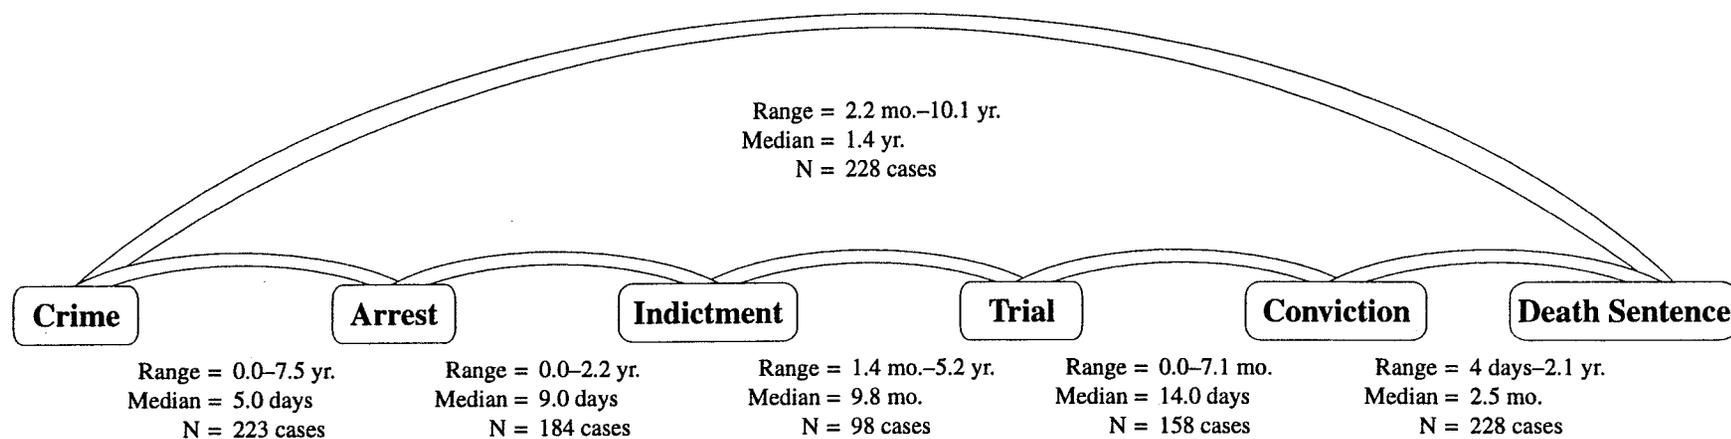

During the same period, six defendants were granted *new trials* due to ineffective assistance of counsel. Of the six defense attorneys, two were court-appointed, one was a public defender, and one was privately retained. No information was available on attorney status in the remaining two cases. Three of the six cases were from Maricopa County, and one was from each of Pima, Pinal, and Yuma counties.

**Exhibit 25. Summary Table of Time Intervals for Arizona Death Sentence Cases,
1974–July 1, 2000, 1974–1989, and 1990–July 1, 2000**

Time Interval	1974–1989	1990–July 1, 2000	1974–July 1, 2000
Crime to Death Sentence	Range = 2.2 mo.–7.8 yr. Median = 1 yr.	Range = 7 mo.–10.2 yr. Median = 1.8 yr.	Range = 2.2 mo.–10.1 yr. Median = 1.4 yr.
Notice of Appeal to Arizona Supreme Court Decision on Direct Appeal	Range = 11.7 mo.–5.5 yr. Median = 1.99 yr.	Range = 1.5 yr.–5.3 yr. Median = 2.7 yr.	Range = 11.7 mo.–5.5 yr. Median = 2.3 yr.
Arizona Supreme Court Decision on Direct Appeal to Petition for Writ of Certiorari	Range = 1.1 mo.–4.1 yr. Median = 5.3 mo.	Range = 2.7 mo.–3.1 yr. Median = 5.6 mo.	Range = 34 days–4.1 yr. Median = 5.5 mo.
Petition for Writ of Certiorari to Court Order	Range = 24 days–1.5 yr. Median = 2.3 mo.	Range = 1.1 mo.–8.4 mo. Median = 2.3 mo.	Range = 24 days–1.5 yr. Median = 2.3 mo.
Denial of Cert to Petition for Post- Conviction Relief	Range = 25 days–4.6 yr. Median = 5.6 mo.	Range = 3.4 mo.–4.5 yr. Median = 1.7 yr.	Range = 25 days–4.6 yr. Median = 1.2 yr.
Petition for Post- Conviction Relief to Trial Court Ruling	Range = 3 days–3.7 yr. Median = 5.6 mo.	Range = 23.0 days–2.1 yr. Median = 6.7 mo.	Range = 3 days–3.7 yr. Median = 5.9 mo.
Petition for Writ of Habeas Corpus to Federal District Court Ruling	Range = 3.5 mo.–11.9 yr. Median = 5.5 yr.	1 case 3.2 yr.	Range = 3.5 mo.–11.9 yr. Median = 5.7 yr.
Petition for Writ of Habeas Corpus to U.S. Supreme Court Ruling	Range = 2.8–17.1 yr. Median = 8.4 yr.	No cases completed	Range = 2.8 yr.–17.1 yr. Median = 7.3 yr.

**Exhibit 26. Arizona Death Sentence Cases: Part I
1974–July 1, 2000 Time Intervals (N = 230 cases)**

Death Sentencing Process

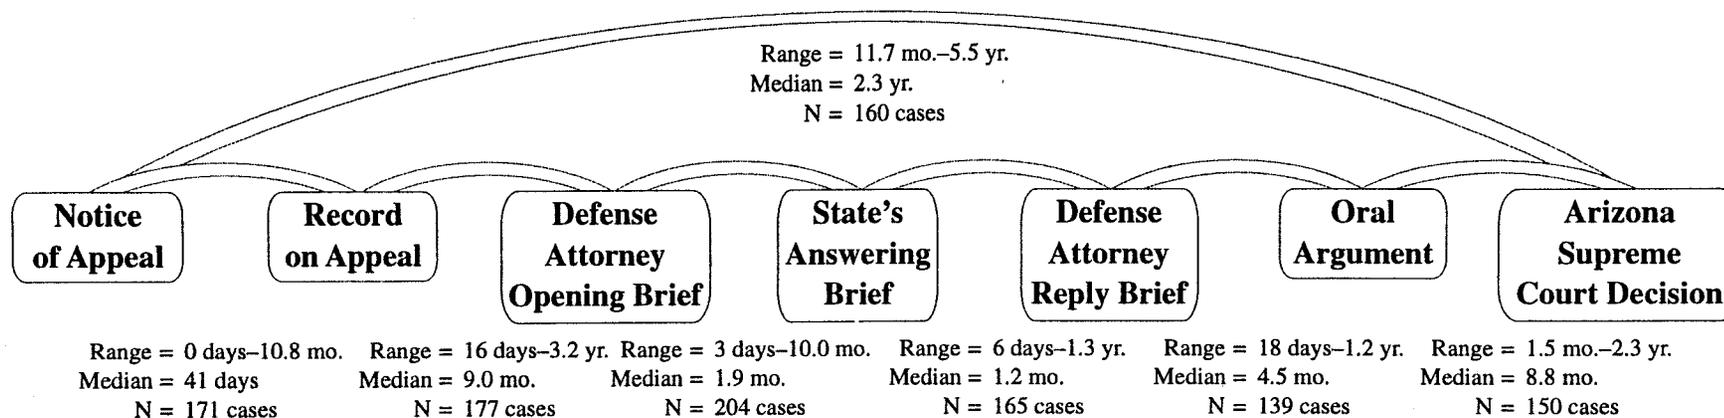

28

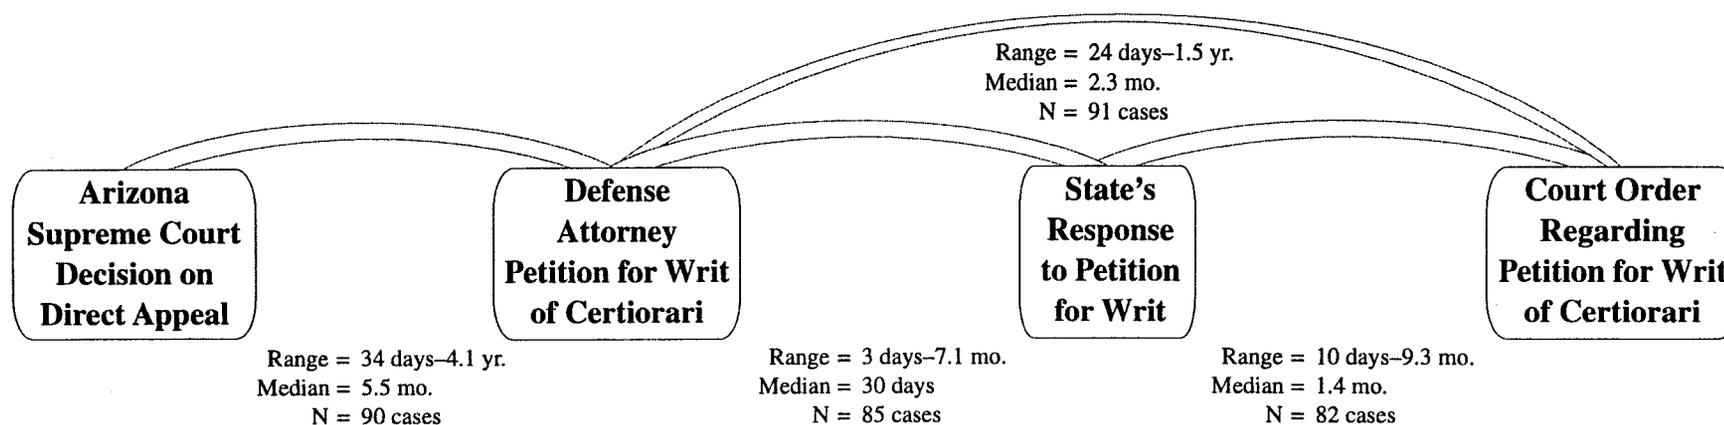

The median is the middle value in the ranked distribution of values.
The range indicates the lowest to the highest values. Appendix C provides further detail on unusual ranges.

Exhibit 27. Arizona Death Penalty Appeals Process: Part II
1974–July 1, 2000 Time Intervals (N = 230 cases)

Direct Appeal Process

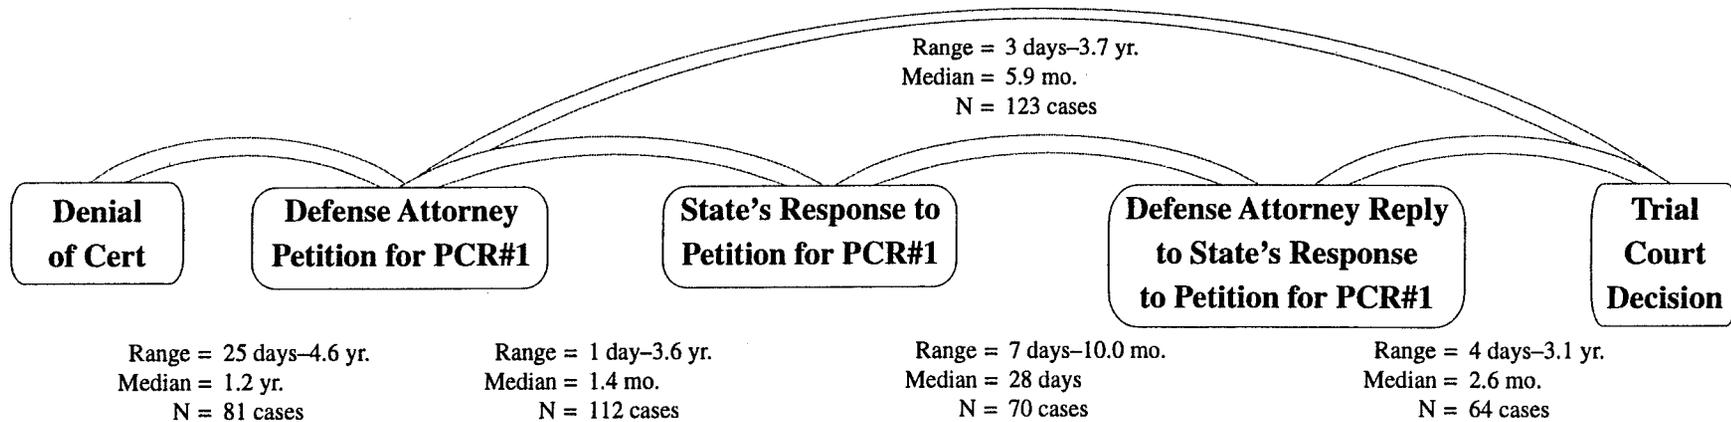

Petitions for Writ of Certiorari

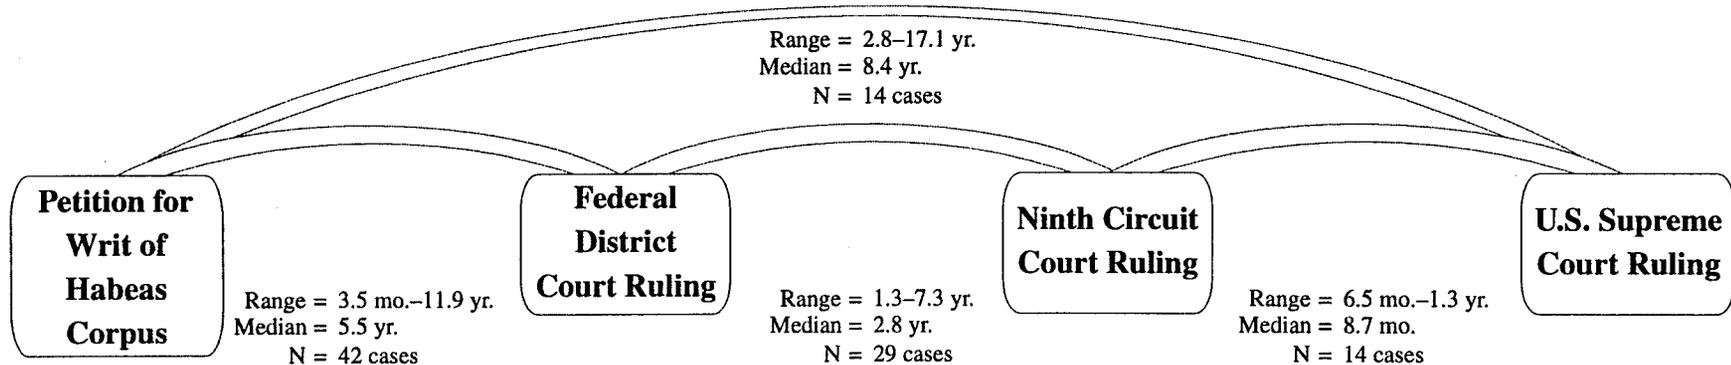

These time intervals reflect each case's initial appeal.
 The median is the middle value in the ranked distribution of values.
 The range indicates the lowest to the highest values. Appendix C provides further detail on unusual ranges.

Exhibit 28. Arizona Death Penalty Appeals Process: Part III
1974–July 1, 2000 Time Intervals (N = 230 cases)

Post-Conviction Relief Petition #1 (PCR#1)

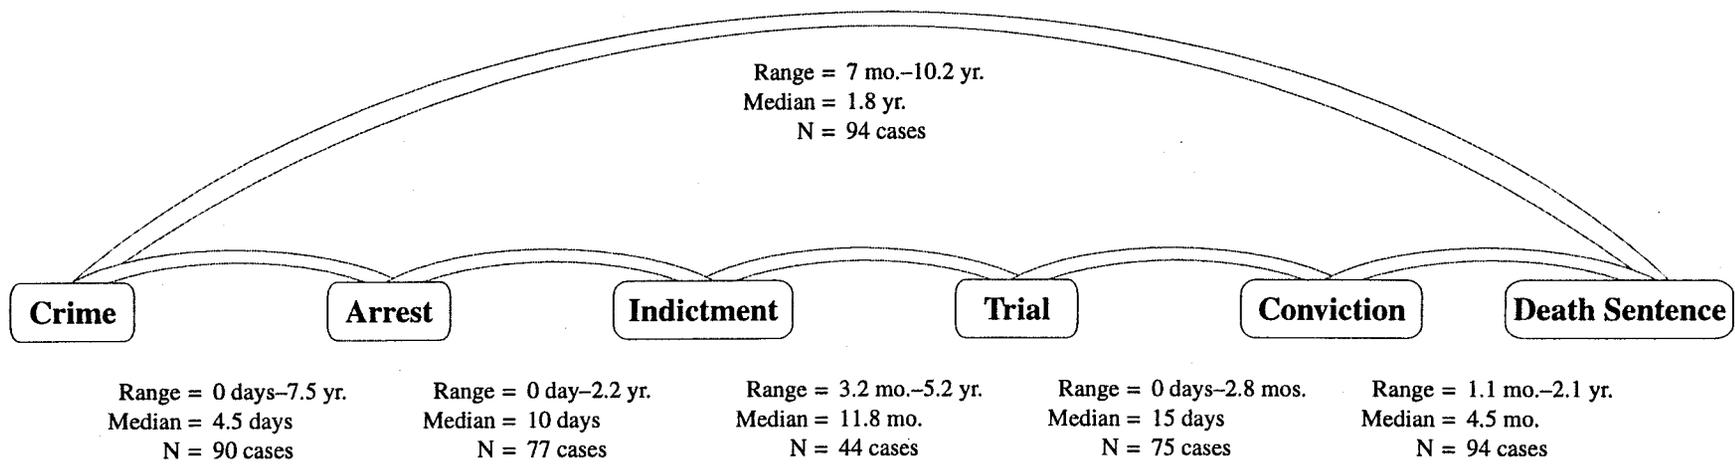

Habeas Corpus

These time intervals reflect each case's initial appeal. The median is the middle value in the ranked distribution of values. The range indicates the lowest to the highest values. Appendix C provides further detail on unusual ranges. The time intervals for habeas decisions are particularly difficult to calculate. Short intervals may indicate procedural dismissals and extremely long intervals may result when a case is held in abeyance while action is taken at the state level. We anticipate further refinement of these data for the final report.

Exhibit 29. Arizona Death Sentence Cases: Part I
1990–July 1, 2000 Time Intervals (N = 96 cases)

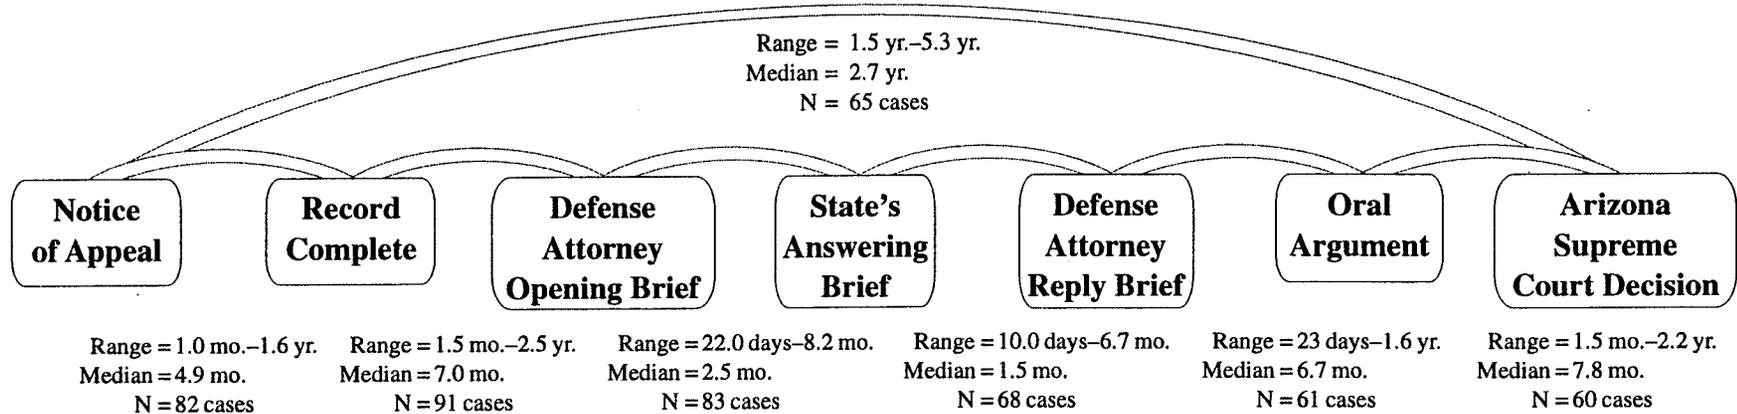

Death Sentencing Process

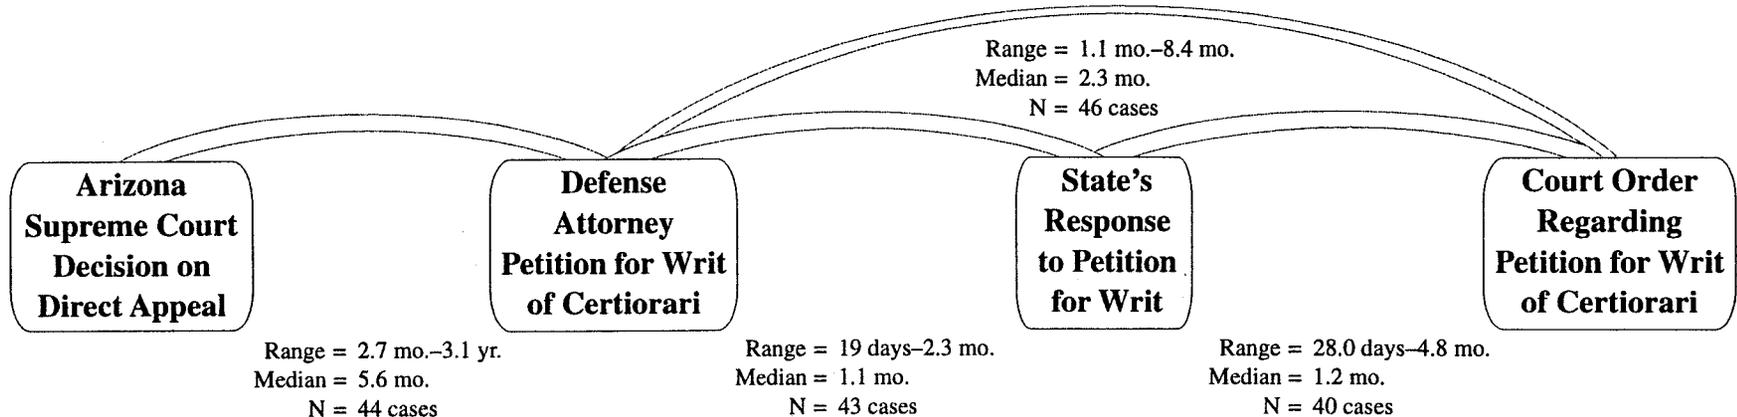

The median is the middle value in the ranked distribution of values.
 The range indicates the lowest to the highest values. Appendix C provides further detail on unusual ranges.

Exhibit 30. Arizona Death Penalty Appeals Process: Part II
1990–July 1, 2000 Time Intervals (N = 96 cases)

Direct Appeal Process

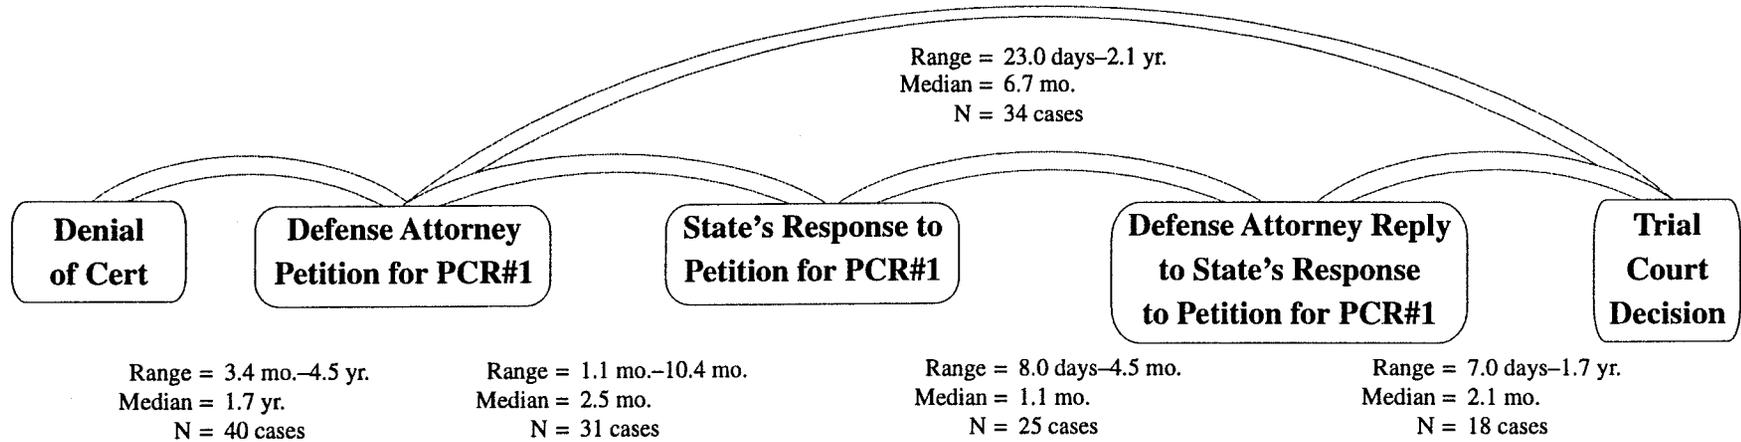

Petitions for Writ of Certiorari

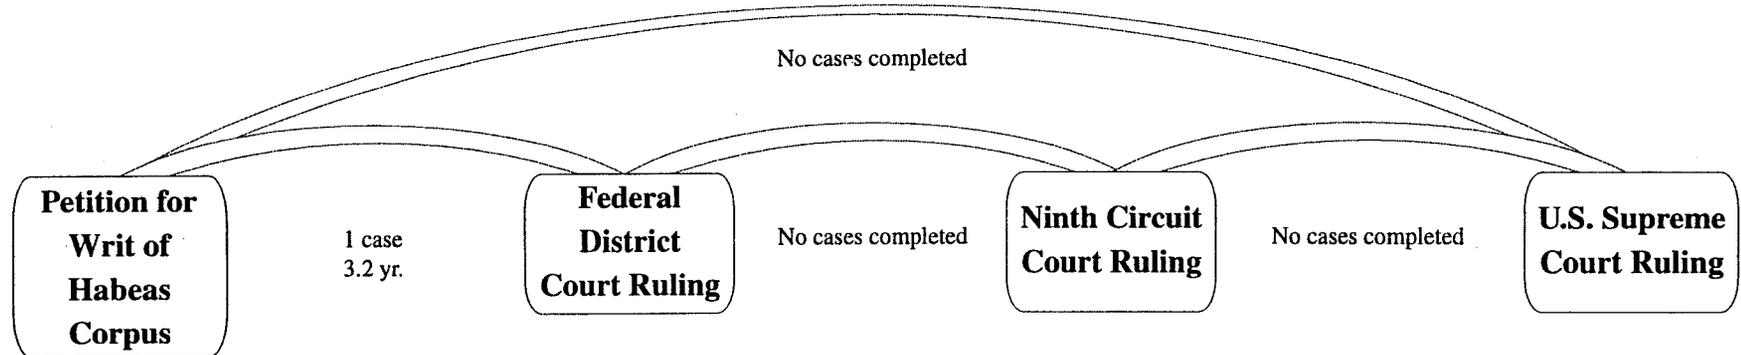

These time intervals reflect each case's initial appeal.
 The median is the middle value in the ranked distribution of values.
 The range indicates the lowest to the highest values. Appendix C provides further detail on unusual ranges.

Exhibit 31. Arizona Death Penalty Appeals Process: Part III
1990–July 1, 2000 Time Intervals (N = 96 cases)

Post-Conviction Relief Petition #1 (PCR#1)

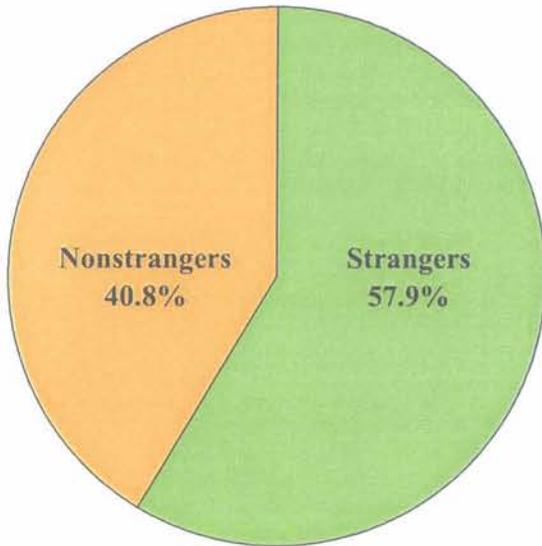

Habeas Corpus

These time intervals reflect each case's initial appeal. The median is the middle value in the ranked distribution of values. The range indicates the lowest to the highest values. Appendix C provides further detail on unusual ranges. The time intervals for habeas decisions are particularly difficult to calculate. Short intervals may indicate procedural dismissals and extremely long intervals may result when a case is held in abeyance while action is taken at the state level. We anticipate further refinement of these data for the final report.

**Exhibit 32. Defendant-Victim Relationships:
Arizona Death Sentence Cases, 1974–July 1, 2000**
(N = 311 relationships)

Overall Relationships

Note: 1.3% could not be categorized.

Nonstranger Relationships

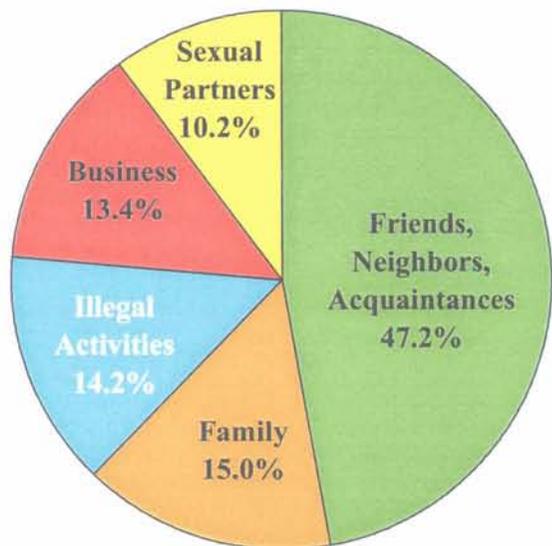

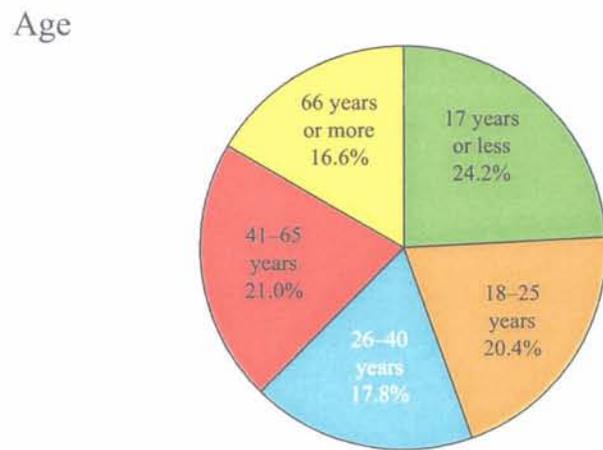

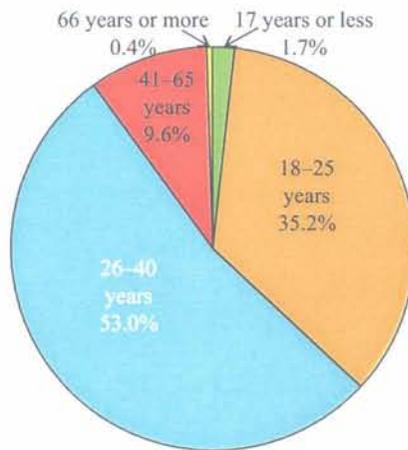

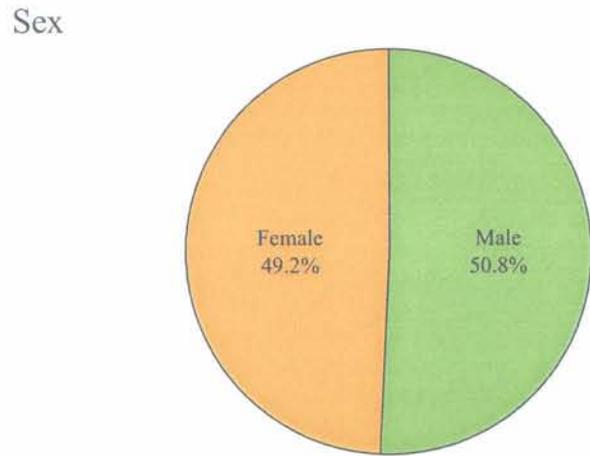

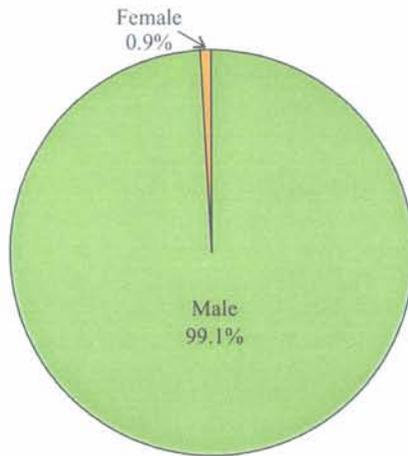

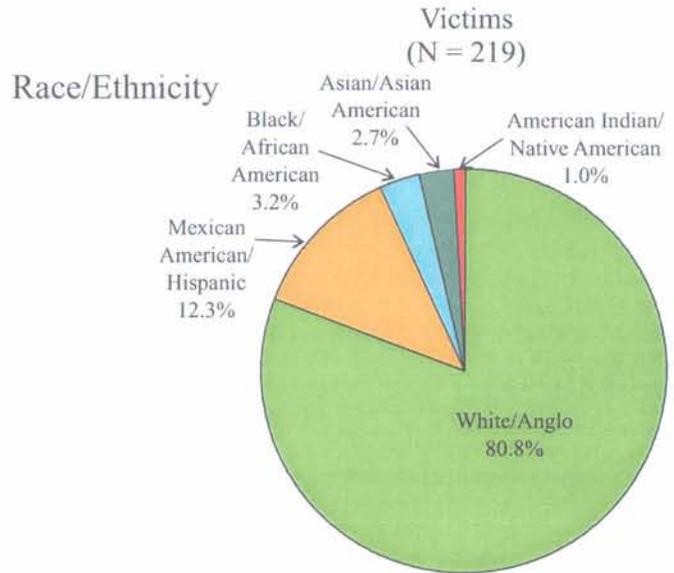

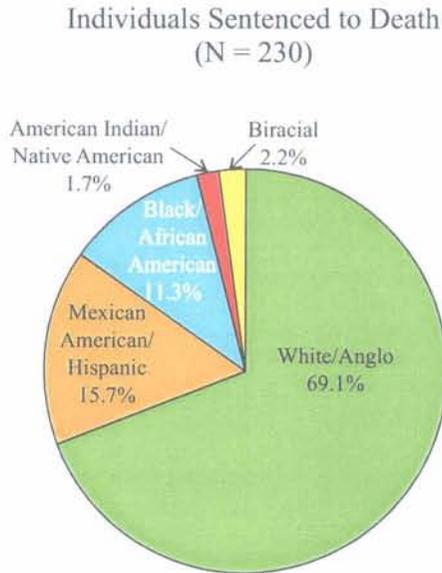

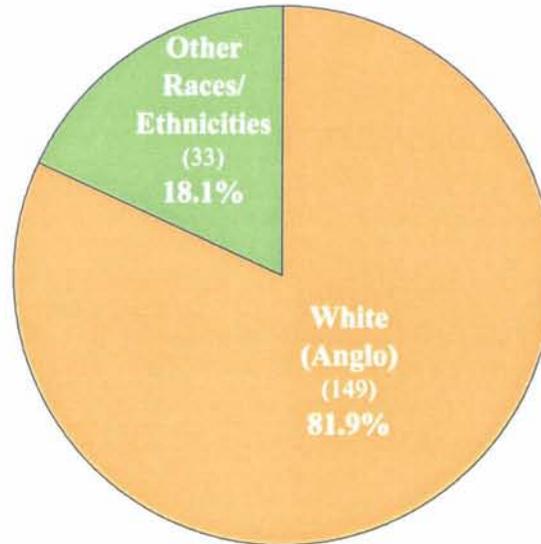

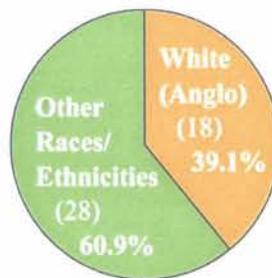

Exhibit 34. Defendant and Victim Race/Ethnicity, Sex, and Age: Arizona Death Sentences 1974–July 1, 2000

**Exhibit 36. Defendant Race/Ethnicity by Victim Race/Ethnicity:
Arizona Death Sentence Cases, 1974–July 1, 2000**
(N = 228 victims, 199 defendants)^a

Victims of White Defendants
N = 182

**Victims of Defendants of
Other Races/Ethnicities**
N = 46

^aRace/ethnicity is not known for all victims. The 228 victims for whom it is known are paired with defendants. The pie sizes are relative to the number of victims, that is, the number of victims of white defendants is approximately 4 times greater than the number of victims of other defendants.

**Exhibit 33. Defendant-Victim Relationships:
Arizona Death Sentence Cases, 1974–July 1, 2000
(N=311 Relationships)^a**

Type of Relationship		Relationships in Category
Percent of Total	Number	
Strangers 57.9%	180	Stranger, police officer, debt collector, real estate agent, gas station attendant, codefendant's sexual partner's stepmother, hitchhiker
Friends, neighbors, acquaintances 19.3%	60	Neighbor, acquaintance, family member of acquaintance, child of sexual partner, family friend, friend, temporarily lived in house to aid in moving, coprisoner, roommate, roommate's son, cohabitating sexual partner's daughter, wife's family member's housekeeper, classmate, girlfriend's daughter, stepmother of girlfriend, cohabitant (not sexual partner), codefendant's son, tenet in same building, sexual partner's father, codefendant's ex-sexual partner
Family 6.1%	19	Spouse, biological mother, adoptive mother, biological father, biological daughter, stepdaughter, biological son, brother's stepdaughter ("uncle"), sister-in-law
Illegal activities 5.8%	18	Drug dealer, coparticipant in drug deal, hired hit-man
Business 5.5%	17	Business partner, employer, former employer, former coworkers, client
Sexual partners 4.2%	13	Sexual partner, cohabitant (sexual partner), former sexual partner
Unable to categorize 1.3%	4	Friend of a friend, renter of defendant's friend, boyfriend of renter of defendant's friend, former coprisoner's wife

^aThe number of relationships (311) exceeds the number of death penalty cases (230) due to multiple victims and codefendants.

^bPercentages may not add to 100% due to rounding.

**Exhibit 35. Victim and Defendant Race/Ethnicity,

Totals	157	100.0%	230	99.9%	113	100.0%

^aInformation is not available for all victims. To avoid double counting victims, this Exhibit includes the victim(s) of one codefendant from each group of codefendants.

^bWe base the defendants' race/ethnicity, sex, and age on the total 230 cases which include 2 individuals sentenced to death in 2 separate cases. Both are white males. One was 20 years old at the time of the first crime and 24 years old at the time of the second; the second individual was 31 at the time of both crimes.

^cIncludes conviction- and sentence-related remands, reversals, and modifications

^dTwo of the biracial individuals were Mexican American and American Indian; 3 were Mexican American and White.

	Prosecution psychologist	<ul style="list-style-type: none"> • Personality disorder 	

(Appendix A, continued)

Case ^a	Mental Health Professionals	Diagnosis/Opinion from Court Documents	Duration of Condition
Tankersley	Defense psychologist	• Extensive drug & alcohol history, acute intoxication at time of offense, bipolar	Lengthy substance abuse history. <i>Note: "Time of crime" intoxicification.</i>
	Prosecution psychologist	• Polysubstance abuse, antisocial personality disorder	
Brookover	Court psychiatrist	• Neurological lesion, minimal brain damage syndrome	Unspecified. <i>Note: "Time of crime" intoxicification.</i>
Stevens	Defense psychiatrist	• Depression, mental disorder	Unspecified, but previous antidepressant treatment noted. <i>Note: "Time of Crime" intoxicification.</i>
	Prosecution psychologist	• Passive/aggressive personality disorder, alcohol & amphetamine dependence, extreme intoxication at time of offense	
Hughes	Defense psychologist	• Impaired capacity, impulsivity, learning disability	Unspecified, but history of polysubstance abuse and past diagnoses of antisocial personality disorder noted.
O. Medina	Defense psychologist	• Anti-social personality disorder, persistent pattern of violence, egregious history	Unspecified, but "pattern" & "history" notes by psychologist. <i>Note: "Time of Crime" intoxicification.</i>
	Prosecution psychologist	• Personality disorder w/ dependent anti-social & compulsive traits	
Epperson	No diagnosis. Jail psychiatrists asked to comment.	• Depression, "not a danger", rehabilitatable From opinions of jail psychiatrists	Unspecified history, no psych. evaluation.
Lavers	Defense psychologist	• Delusional paranoid disorder, obsessive-compulsive personality disorder, alcohol dependence, (binge type), extreme intoxication at time of crime.	Unspecified. <i>Note: "Time of crime" intoxicification.</i>
	Prosecution psychiatrist	• "Insufficient symptomology" to support Tatro diagnosis	

^aThe available data contain minimal systematic information regarding mental health considerations. At the time of sentencing, approximately one-half of the defense attorneys alleged statutory mitigation factor G-1. In 13 cases the sentencing judge ruled that the factor existed.

Spoon	Defense psychiatrist	• Schizophrenia; paranoid type	Unspecified but long-term.
Thornton	Defense and prosecution psychiatrists	• Anti-social personality	Unspecified but long-term.
Williams, R.T.	No psychological evaluation ordered.	Personality disorder	Unspecified.
Webster	Unclear but psychological evaluation conducted	• Documented learning disorder • Impulsivity • Emotional and mental immaturity • Borderline intellectual functioning	Unspecified but long-term.

Appendix C. Explanatory Notes for Time Intervals, Exhibits 25–31

The time interval data are complex and difficult to portray in a meaningful way. Frequently, intervals that appear “extreme” are accurate, but they may follow an unconventional path in the appeal process or intervening factors may have influenced the long time interval. The following are examples:

Time Interval and Explanation

Crime to Arrest

- 2,722 days Defendant was not apprehended until featured on a television crime show.
- 1,573 days Defendant was apprehended five years later.
- 2,573 days Defendant was apprehended while in prison for a separate crime.
- 1,706 days Defendant was apprehended after an anonymous tip on the 88-CRIME phone line.
- 1,835 days Defendant was extradited to Arizona from the Utah prison system.

Indictment to Trial

- 1,894 days Continuances of trial for DNA testing as well as new counsel appointed over a five-year period.

Notice of Appeal to Record Complete

- 601 days A court reporter moved to another state without transcribing several days of an evidence suppression hearing. There was difficulty in locating her and she was initially somewhat uncooperative in preparing the transcripts. In addition, the court reporter eventually admitted that she could not prepare one of the transcripts because she lost the notes. The case had to be remanded to the superior court for reconstruction of the record for that day of the hearing.

Record Complete to Opening Brief

- 908 days After the original notice of completion of record, the record on appeal was expanded to add a large number of additional transcripts that had to be prepared. Those included proceedings in the defendant’s case, his co-defendant’s case, and grand jury proceedings. There was also difficulty ascertaining the exact dates of the numerous grand jury proceedings and obtaining transcripts of same.

Opening Brief Order to Opening Brief

- 469 days Three requests for extension of time to file.

Opening Brief to Answering Brief

- 301 days Motion to strike revised opening brief; motion for extended time to file answering brief; motion for extended time for clerk to file; motion to impose sanctions.

(Appendix C, continued)

Response to PCR to Reply to Response

812 days Motion to extend time to file; petition dismissed; telephonic status conference; motion to continue; extension to file.

PCR Petition to Response to PCR

1,321 Request for investigator; reprieve hearing scheduled, commutation hearing, request new trial.

PCR to Order PCR

1,525 days Motion to extend time to file response and reply; assignment of judge.

1,062 days Motion to extend time to file amended PCR; request funds for investigator; motion for discovery; plea agreement.

PWCert to Opposition Brief

3 days Docket dates show date received petition not date filed

Habeas Intervals

Seemingly extreme intervals at the federal level may be due to a case being held in abeyance while action is taken at the state appellate level.
