P R E F A C E

This Aviation Directory, prepared and distributed by the Arizona Department of Aeronautics, has been compiled from the latest information available from the most reliable sources. The Directory has been compiled as a result of the many inquiries through this office concerning various aviation agencies and airports throughout Arizona. It is hoped the users will find it useful in providing the information required.

Since facilities change from time to time, the users of this directory are requested to provide this department with any changes or suggestions for improvements or revisions in subsequent editions.

Distribution of this directory will be made to all Arizona aviation organizations or agencies, all Arizona State Departments, schools, libraries and aviation departments of other states. Copies will be furnished to others on request.

FILM LIBRARY

The following 16 mm films are available for loan on request to the Department. The only obligations in borrowing film are to: assume responsibility for its safety while in possession; return film day after showing; prepay postage for returning film; show on a first quality projector. Mail requests to: Arizona Department of Aeronautics, 3000 Sky Harbor Boulevard, Phoenix, Arizona, 85034.

-----

Age of Vertical Flight - Color 21 minutes  
Shows the development and uses of the Hiller Helicopter.

Agricultural Aviation - Color 14 minutes  
A modern evaluation of the aerial contributions to agriculture in application of insecticides, herbicides and fertilizers. Portrays advancement of chemistry in growth regulators, defoliants and pesticides.

The Air Age - Color 31 minutes  
Shows how the airplane is used in various utility adaptations portraying the social, political and economic impacts of aviation on today's "way of lift." Interwoven with conservation.

Air Maniacs - Black and White 10 minutes  
Comedy film with antique planes doing loops, spins, snap rolls, inverted flight, flying through a hangar, etc. COMBINED WITH Aviation Oddities-Black and White  
See Fokker Tri-Motor "Bird of Paradise", also many strange-looking contraptions -- some that flew, many that didn't. Many humorous scenes from the experimental days of aviation.

Airplane Changes our World Map - Black and White 11 minutes  
Traces the evolution of world map concept from ancient times to the air age. Considers early problems of map projection on flat surfaces, reviews present-day concept to mapmaking as influenced by the airplane.

Film Library, Continued

Airport America - Color 14 minutes

Comprehensive study of role the airport plays in modern American scene and its value to the community.

Airports Mean Business - Color

Shows how an airport contributes to the economic development of a community by bringing in industry and business. Specific examples in different parts of the country are cited. Excellent promotional film for civic groups, service clubs and public officials.

Arizona Skyways & Trailways - Color 23 minutes

Made in Arizona at Ray Schnepf's Ranch and Parker, Lake Havasu, Lake Mead, Temple Bar, Pierce Ferry, Colorado River in Grand Canyon, Page, Glen Canyon Dam, Lake Powell, Oak Creek, hunting and wild life scenes, Flying Farmers Annual Legislative Air Tour.

Aviation and the States - Color 20 minutes

Shows the activities and functions of a typical State Department of Aeronautics.

Basic Radio Procedures for Pilots - 30 minutes

Punctuated by humor and common sense, this film is designed to familiarize private pilots, and particularly novices, with proper radio procedures while communicating with FAA flight service stations and airport traffic control towers.

Best Investment - Color 25 minutes

Arthur Godfrey narrates on business decentralization, uses one town and interviews on how a community airport brought business and wealth to its community.

Come Fly With Me, Darlene - Color 14 minutes

Fun and family; story of wife happy for husband to fly but afraid of flying herself; got left out of things; took AOPA "Pinch Hitter Course" -- see class room and flight training.

Density Altitude - Color 29 minutes

This film follows a young married couple on a vacation flight from New Orleans to Lake Tahoe. In crossing the Rockies and the High Sierras, they learn the hard way about the effects of high altitude and temperature on light aircraft performance. The film illustrates proper operation of airplanes under density altitude conditions.

Discover Flying - Color 13 minutes

Discussion of man's constant desire to fly, the relationship of the engineer with today's computerized technology to design of today's aircraft. Animated description of the control surfaces

Film Library, Continued

Discover Flying, Continued

and their response to pilot manipulation; study of various instruments in today's plan and function in flight; actual flight lesson as given to a sixth-grade elementary teacher demonstrating use of instruments, etc.

Farnsborough Fly Past - Black & White 17 minutes

Annual air show and display of new developments in British aircraft held at Farnsborough.

The Flight Decision - Color 14 minutes

Aviation safety subjects. Clarifies the factors of stimulus, circumstances and weather correlated with pilot's decision to continue under marginal conditions as major contributing cause in aviation safety consideration.

Flying Businessman - Color 14 minutes

Older film, older type aircraft but still good message to businessman pilot. Depicts business office in an executive twin, lists different type businessmen using planes in their businesses, cost of learning to fly, requisites, check ride, FAA written examination.

The Helicopter - Black & White 10 minutes

USES; carrying freight, crop dusting, power and pipe line inspection, water and swamp landings, war evacuating, observation, directing artillery fire and passenger carrying capability.

Highlights of Aviation - Black & White 11 minutes

Experimental days to the DC-3. See the Airship Hindenburg, early experimental planes, the Wright Brother's flight at Kitty Hawk, Kellett Autogyro, Twin Engine Amphibian Seaplane, Etc.

COMBINED WITH

Historic Review of Aviation - 1920's 14 minutes

Covers the history of aviation from World War I and during 1920's. See Eddie Rickenbacker, President Woodrow Wilson, first air mail service, other historic events.

COMBINED WITH

Lindberg's Flight - Black & White 10 minutes

Historic Film of flights and attempts of flights finishing with Lindberg's Flight and his welcomings in Europe and New York.

Highway in the Sky

Aviation Training; modern aerial navigation with VOR.

How Airplanes Fly - Color 18 minutes

What makes an airplane get off the ground and stay aloft? An easy-to-understand film which combines animation and live se-

Film Library, Continued

How Airplanes Fly, Continued

quences to explain basic aerodynamics for general aviation pilots and high school science students alike. Forces of lift, weight, thrust, and drag are shown in relation to flight.

Kites to Capsules - Color 5 minutes

A fast-moving, humorous film that contrasts early flying attempts with modern, successful commercial and general aviation. The movie will delight any audience.

Man in Flight - Color 33 minutes

Walt Disney animated, shows development of airplane from early Chinese experiments in flight to development of modern jets.

Medical Facts for Pilots - Color 25 minutes

Directed particularly to beginning pilots, this film provides a look at some of the logical limitations in flight. It alerts pilots to such aeromedical factors as disorientation, the effect of alcohol, oxygen requirements, and pilot vision.

One Eye on the Instruments - Color 18 minutes

Story of a "seat of the pants" pilot vs. a Blue Seal trained pilot - his experience in entering a marginal weather situation and his decision to get his Blue Seal.

Path to Safety - Color 20 minutes

More accidents are caused by human error than by any other factor. Cliff Robertson stars in this film as a flight instructor briefing a class of student pilots on dramatic incidents occurring as a result of misjudgment.

Plane Sense - Color 20 minutes

Let the buyer beware, warns this film -- especially first-time purchasers of used aircraft. The movie offers safety hints to the prospective pilot and airplane owner, outlines his responsibilities in maintaining the aircraft, and shows him how to keep abreast of pertinent FAA regulations concerning the operation and maintenance of his plane.

RX for Flight - Color 20 minutes

Alcohol, drugs, hypoxia, disorientation, smoking, and safety equipment all lend themselves to a discussion of the basic aeromedical problems that confront general aviation pilots. This film is recommended for private pilot training classes and flight safety seminars.

Stable and Safe - Color 20 minutes

Most pilots have heard the ominous term, "graveyard spiral," but aren't exactly sure what causes it. This film, aimed particularly at pilots who are not instrument-rated, reveals what

Film Library, Continued

Stable and Safe, Continued

frequently happens when pilots inadvertently fly into marginal or IFR weather and lose their visual reference, becoming dangerously disoriented. The film describes the different types of stability augmentation systems available for use in general aviation aircraft to assist pilots in maintaining control.

Tommy Takes a Look at Space

Transpo '72

Using the Airspace - Color 25 minutes

Navigation - communication.

Wake Turbulence - Color 16 minutes

This film is designed to familiarize the general aviation community with the latest information on the phenomenon of wake turbulence, particularly with respect to the hazards it presents to small span general aviation aircraft operating in a mixed traffic environment. The film uses animation and live footage to document recent in-flight testing that has produced significant technical data regarding the trailing vortices generated by heavy jet aircraft. Primarily aimed at the VFR pilot, the film includes actual vortex encounters shot during flight tests and describes the characteristics and locations of vortices. This film replaces the former FAA motion picture titled "Wake Turbulence."

ARIZONA AIR SEARCH AND RESCUE  
AVIATION EMERGENCY SERVICES

In the event of any emergency, natural disaster or civil disturbance, which may require emergency airlift, aerial search and rescue, or aerial reconnaissance, a call to the sheriff or a deputy in the particular county will set the operation in motion with a minimum of delay. The sheriff will determine which other agencies are needed, depending upon the scope of the operation, and contact them at once. If the services of Civil Air Patrol are required, the sheriff will call the Western Aerospace Rescue and Recovery Center (WARRC) at Hamilton AFB, California. WARRC will contact the appropriate CAP unit and assign the mission.

The county sheriff is the primary contact for all emergency services. Other contacts in each county are listed for information.

## MEXICO FLIGHTS

### PREFACE

A flight into Mexico can be a delightful or disastrous experience, depending on your homework and preparation prior to departure. This section of the Directory is written to assist you in making a pleasant journey to and from Mexico. Let's start with regulations.

Article 341, Fraction V, of General Communications Law establishes that the owners or possessors of private aircraft used exclusively for private matters or recreation, and who desire to fly over Mexican territory or land therein, must give prior notice to Secretariat of Communications and Transport. A completed flight plan filed with your nearest F.S.S. will suffice.

If a private owner is flying a single or multi-engine aircraft, it must have not more than 14 seats for passengers, and the transportation must be free. There may be only invited guests in the aircraft -- no cargo or merchandise. There may be no articles of any kind, except those for personal use of passengers and crew. If the aircraft exceeds 14 passengers or carries cargo and passengers for hire, consult Part 6 of the Customs Regulations.

If you rent or borrow an aircraft, you must provide a notarized letter from the aircraft owner stating that you have permission to use said aircraft for business or for pleasure.

### TOURIST PERMITS

- A. One trip to Mexico 180 days -- no charge
- B. Multiple trips to Mexico up to 180 days -- no charge.  
This requires three passport-size photographs.
- C. Or obtain and use a passport.

### AIRPORTS OF ENTRY

Tijuana - La Paz - Mexicali - Hermosillo - Nogales - Juarez

FAA tie-in stations for these airports are San Diego, El Centro/Imperial, Yuma, Phoenix, Tucson, Bisbee-Douglas International, El Paso.

### BORDER CROSSING REGULATIONS

A first landing in Mexico must be at an airport of entry, unless prior specific approval to land at another airport has

## Mexico Flights, Continued

been obtained from Mexico City. Each person in the aircraft, 16 years of age or older, must have a tourist permit or proof of citizenship. For use in obtaining one, a passport, birth certificate, or an affidavit signed by a notary public is acceptable. You must also have proof of aircraft ownership.

If you are northbound, your departure from Mexico must be from your airport of entry unless prior approval from Mexico City has been obtained. Permits must be surrendered to customs officials at this time.

Unless prior permission has been granted, the first landing in the U. S. must be at an airport of entry. Advance notice of arrival and landing is required. Use of landing rights airports require approval in advance from the Deputy Collector of Customs serving such airports. A declaration of all purchases from Mexico is required.

### MEXICAN FLIGHT PLANS

Flight plans are required by Mexican law for most flights in Mexico. Each flight plan must be closed unless the destination is a remote point having no communications facilities. Suitable arrangements may be made with officials at departure airports in such instances. A charge is made for each flight plan and for other services if the pilot does not possess a current RAMSA card.

### INSURANCE

Be sure to carry at least 50,000 U. S. dollars worth of liability insurance. This may be purchased from your own agent through a Mexican company. Mexico does not have an organization equivalent to the FAA, and their communications facilities are limited. Mexican flight plans do not necessarily furnish any protection in the form of search and rescue or even of inquiry, should you fail to arrive at your destination. The U. S. Coast Guard especially recommends to those who fly along the Baja, California Peninsula to "make sure someone back home knows when and where you are going and how you will report safe arrival."

### RAMSA CHARGES (Compulsory Charges)

The airport of entry will make all the charges going into Mexico, and you will receive a statement showing the various charges and showing that you have paid them. They will not charge for weather services which you do not receive, but they will charge for the first control tower service and radio

## Mexico Flights, Continued

aid to air navigation if you fly over and/or land at your destination within 160 miles of one of these stations. In other words, if you are flying to Cabo San Lucas at the tip of Baja, California from San Diego, you will be within 160 miles of that point. They will also charge for the hours enroute to your destination. If you are flying a small plane, it takes about 5 hours to Cabo San Lucas, and you will pay \$1.74 for each hour enroute. If, however, you were to land at Mulege or Bay of Los Angeles, you would only have to pay for use of the Tijuana Tower Service Radio Range, as you would be over 160 miles from any radio aid to navigation. All of these charges are made for entering Mexico, and you will pay them again on your return trip at your airport of departure. RAMSA card holders are exempt from paying any of these RAMSA charges.

VFR or IFR flight plans must be filed in Mexico. Check with the Field Commander on arrival and prior to departure. VFR cruising altitudes are the same as in the United States when flying above 2,000' X.G.L.

Avoid flying over mountains and large unpopulated areas or over water as much as possible. Air sea rescue facilities are not available.

### INTERNATIONAL PORTS OF ENTRY

Douglas, Arizona  
Nogales, Arizona  
Phoenix Sky Harbor International Airport  
Tucson International Airport  
Yuma International Airport  
Calexico, California  
Mazatlan Sinaloa
